

## Technical Bulletin 007

### PALLET RACK DAMAGE-12 REASONS TO USE PROTECT-IT™

If any your pallet racking looks like one of the 12 photographs below, then you can be sure of four things.

1. Your Forklift driver made a mistake.
2. You were not using **Protect-it™** Pallet Rack Guards to protect your racking from accidental forklift impacts.
3. There is a significant risk of rack collapse, personal injury and un-necessary repair costs.
4. It is your legal obligation to undertake expensive repairs to restore the column.

# COLUMN AND RACK PROTECTION

# PROTECT-IT™

[www-protect-it.com.au](http://www-protect-it.com.au)

The above damage could have been avoided had **Protect-it™** Pallet Rack Guards been installed. **Protect-it™** pallet rack protectors are designed to protect racking from front impact, side impact and reversing impact during pallet withdrawal.
